

THE KIEFER® CHOICE

It's challenging to breed tough herds that stand up to Mother Nature and can out perform in any environment, no matter where you raise them. Lot feeding, pasture raising and the open range each present their own set of challenges. It's time you pair your challenges with a trailer that is built to meet them. Kiefer Livestock Trailers let you go where other trailer manufacturers wouldn't dream of sending their trailers. The Kiefer line allows you to load and unload easier, provides a comfortable ride for your herd, and has proven its reliability year after year. You will find the Kiefer trailer walls, floors, gates, axles and frame are designed to meet the daily challenges you face.

Deluxe II Bumper Pull Livestock Trailers

"The Best Aluminum bumper-pull Livestock Trailer in the Industry"

Aluminum interlocking flooring with integrated cross member every 4-1/2 inches make this simply the strongest floor available!

- **Double headers** over every interior gate for more center gate support and longer gate life.
- **4 x 4 inch superstructure** - strong rear door frame with large cast corners—moves stress from corner welds
- **Side uprights** extending past the floor - not reliant on the welds only for wall strength.
- **Quick slam latches** feature allows quick closure of doors and gates and alleviates the worry of livestock getting past the gates.

Deluxe II Gooseneck Livestock Trailers

All Aluminum "Top of The Line"

The "beefiest" all aluminum stock trailer in the industry features a square tube rear frame 4" x 4" exclusive and extruded aluminum planking floors and sides.

- **Aluminum plank flooring** with cross member every 4-1/2 Inches - the strongest floor in the industry.
- **Double headers** over every interior gate for more center gate support and longer gate life.
- **4 x 4 inch superstructure** - strong rear door frame with large cast corners—moves stress from corner welds.
- **Side uprights** extending past the floor - not reliant on the welds only for wall strength.
- **Quick slam latches** feature allows quick closure of doors and gates and alleviates the worry of livestock getting past the gates.
